**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

Cancellation of claims 1-10 are acknowledged. The prior Office Action is withdrawn due to Applicant's submission of the translation of the French patent overcoming the date of the Ramdani reference.

#### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 14-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 0486 475 A2 to Ando et al.

Ando teaches an amorphous oxide film composed essentially of an oxide of Hf (amorphous hafnium oxide) and one oxide of Si (silicon oxide). The amorphous oxide film is in a multilayer structure of at least three layers comprised of the amorphous oxide types, thereby producing a stack, alternate layers, and where the other layer comprises silicon oxide. See abstract, page 10, lines 1-30, and Figures 2-8. While Ando does not teach the density requirement of less than 8 g/cm<sup>3</sup>, the film is made by sputtering techniques which are known to vary density. Absent of the showing of the criticality for the density it would have been obvious within the level of ordinary skill in the art to produce a density less than 8 g/cm<sup>3</sup> for the Ando reference because the film is produce via sputtering techniques which is known to vary the density.

Art Unit: 1774

*Response to Arguments*

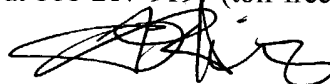

3. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection. While Ando was used prior, Ando still provides for a similar amorphous hafnium oxide film. Although Ando does not teach the density requirement, Applicant has not provided any evidence to the contrary that the Ando reference does not read on the instant claims.

*Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tamra L. Dicus whose telephone number is 571-272-1519. The examiner can normally be reached on Monday-Friday, 7:00-4:30 p.m., alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rena Dye can be reached on 571-272-3186. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
